

# NELLIE IBBOTT RESERVE PARK IMPROVEMENTS

## LIZARD SCULPTURE

Banyule City Council have recently installed a new lizard sculpture that was carved in-situ by local Indigenous artist Phillip Howe.

## PROPOSED WORKS

### Lizard Garden embellishment

Surrounding the new lizard sculpture a gravel surface and some native grasses will be installed.

### Path works

We will also be installing two new sections of path to improve the parks accessibility. We will be formalising a goat track towards Maud Street and also connecting the playground to the main path.

### Nature Play

To compliment the new lizard and existing playground, we will be installing some nature elements to provide the community with a space for imaginative play and a connection to nature

## TIMELINE

Works are scheduled to commence early 2024.

## CARVING THE NEW LIZARD

Timber from North East Link Project was used to create the new lizard sculpture in the park. The lizard is a tribute to lost habitat and a reminder to care for local wildlife.

The lizard is to be enjoyed by all and interacted with.

The process of creation:
